## **Climate Change and the Long Island Sound Estuary Workshop Contract for Climate Change Activity**

Along with my participation in the workshop, I agree to complete a climate change activity at my school to earn the additional \$100 participant stipend paid by New York Sea Grant - Cornell University.

The climate change activity may be one of the following: energy audit of school; water audit of school; climate change classroom presentations to other students not in your class; or, starting a climate change action club. If you have another idea for the activity, it must be approved by Amy Mandelbaum.

A final report on the climate change activity will be emailed to Amy Mandelbaum at acb328@cornell.edu by Friday, January 2, 2015. The report must include photographs and a one-page write-up on the details of the climate change activity and what you accomplished (what activity you completed, how many students reached, and what you and your students thought of the experience).

The climate change activity will be completed by the following educator by Friday, January 2, 2015 to receive the additional \$100.
